

Polytechnic Energy Academy

Who We Are

The Academy provides the opportunity to attend intensive academic program with lectures, live sessions, interactive online lessons, keynote sessions, cultural course and research sessions.

Our program:

Academic Courses

- Nuclear Engineering
- Turbomachinery
- Electrical Engineering
- Petroleum and Gas Engineering
- Digitalization in energy industry
- Sustainable Energy Technology
- Hydrogen Energy

Energy Forum

The Polytechnic Energy Academy's Energy Forum is a forward-thinking, hybrid forum designed to foster meaningful exchange and collaboration across diverse fields of energy engineering and technology. This event will bring together an international audience of experts, students and enthusiasts to discuss, analyze, and innovate around the pressing energy challenges of today and tomorrow. With both in-person and virtual participation options, the forum is structured to maximize engagement, inclusivity, and impact.

Energy Schools

Spring Courses
